

## **Density & Concentration Measurement: Your Samples in Our Focus**

Do you have a tricky sample to be measured?  
Are you looking for a suitable measuring instrument?  
Do you need support with it?  
Go and ask your Anton Paar partner for help!

### **You can make sure to go for the best solution**

The analysis of tricky customer samples is a matter of concern to us. Not only to support our customers in application matters, but also to gain valuable experience on how to improve our instruments' performance in the future, Anton Paar is always anxious to provide the best support with high quality and on time.

Are you planning to invest in a suitable instrument but are not entirely sure about the optimum solution for your application problem?

Support is only a phone call away! Get in touch with your nearest Anton Paar representative and describe your application problem. If support is feasible, your Anton Paar representative will provide you with the required documents to ensure a straightforward workflow:

- **Workflow for the Analysis of Customer Samples,**
- **Questionnaire for the Analysis of Customer Samples.**

### **The following instruments are available for testing samples:**

- DMA 35
- DMA 500
- DMA 4100/4500/5000 M, optionally with sample changer Xsample
- DMA 4200 M
- Alex 500
- Snap 40/50
- DSA 5000 M
- Soft Drink Analyzer M
- AlcoLyzer M | HazeQC ME
- PBA-B
- PBA-S/SI/SD
- CarboQC | CboxQC | OxyQC

### **Analysis charges may be lower than you think!**

Your Anton Paar representative will be happy to inform you about any charges that may apply.

Analysis is free of charge

- for the development of new applications and
- in association with important projects.
