Adding value, naturally

## ECOVA, A GLOBAL ECO-DESIGN APPROACH

EMBALLAGE IDÉAL  
POUR LES  
PRODUITS BIO  
RÉPONDANT À  
LEURS CRITÈRES ET  
DÉMARCHE  
ENVIRONNEMENTALE

Eco-designed, Ecova bottles meet the same standards of technical and aesthetic quality as the traditional products in our range, while enjoying all the eco-friendly advantages of glass and a controlled production process.

## ECOVA, A GENUINE MARKETING IMPACT

ECOVA EVOLUTION AND TRADITION RANGES: 15% LESS CO2 EMITTED DURING PRODUCTION

Creative forms and decoration, elegant packages: Ecova has been designed to reinforce the quality perceived by the consumer and position the bottle at the high end of the aesthetic scale of container glass. For both standard and custom products across all markets, Ecova is a compelling new solution for adding value to products and capturing market share in France and around the world.

## ECOVA, TANGIBLE BENEFITS

AN ECOVA TRUCKLOAD = MORE THAN 1000 EXTRA BOTTLES OF FINISHED GOODS

Using Ecova designs immediately achieves savings for your company's logistics and environmental footprint. It also allows to erase the borders, especially to countries, which impose strict rules concerning glass packaging's weight. (ex : LCBO in Canada).
