T
tank

Pressure tank is used for making champagne with charmat method. It can also be used for some other production process under pressure. CE certificate ensures maximum quality and safety.

[details](#) ➔

M
tank

The multi-purpose mixer is meant for the usage in the wine production. The removable door enables an easy charge and the geared motor enables a slight mixing. For a better mixing efficiency this tank has a built-in flow breaker.

[details](#) ➔

PP
tank

The tank with floating cap is used for the storage of wine and other alimentary liquids. The high polished tank's inside does not allow the capture of wine scale and facilitates the cleaning of the tank. Pipes and valve are made of stainless steel.

PZ
tank

The tank with air cap is used for fermentation and storage of wine and other alimentary liquids. The high polished tank's inside does not allow the capture of wine scale and facilitates the cleaning of the tank. Pipes and valve are made of stainless steel.

[details](#) ➔

ZR
tank

Tank for the storage of alimentary liquids (wine, brandy, juice, oil, vinegar...).

[details](#) ➔

PM
tank

Tank for milk with special fastener for hermetical closure.

OUT OF PRODUCTION

DS
distillery

Mini distillery is used for distilling crops, fruits and different herbs. It is also convenient for production of hydrolates and essential oils. It can be heated using gas or electric heaters, and for cooling it uses tap water from indoor plumbing.

OUT OF PRODUCTION

VF
filter

Plate filter for filtering wine. Made with or without integrated pump.
